

CIVOS 2.0 Snapshot v1.0 — Read-Only Constitutional Record

Status: SNAPSHOT (IMMUTABLE)

This document defines a frozen, read-only snapshot of the CIVOS 2.0 system state after completion of Phase 4 (Skill Evidence & Readiness).

This snapshot is **not a roadmap**, **not a product claim**, and **not a production declaration**. It exists solely as a constitutional and evidentiary record.

1. Purpose of This Snapshot

This snapshot exists to:

- Preserve the exact constitutional state of CIVOS 2.0 at a known point in time
- Provide defensible evidence of AI behaviour boundaries
- Record what the system **can** and **cannot** do
- Prevent silent scope creep or retroactive reinterpretation

This snapshot allows future work to **reference** this state without modifying it.

2. What This Snapshot Represents

At the time of this snapshot:

- CIVOS 2.0 has completed Phases 1–4 under constitutional constraints
- All Sessions (1–4) are sealed and immutable
- AI execution is limited to **Type A work only**
- AI holds **zero decision authority**
- HOLD boundaries are implemented, triggered, and respected
- AI silence under boundary pressure has been demonstrated

This snapshot represents a system that has been **trained for discipline**, not autonomy.

3. What This Snapshot Explicitly Does NOT Claim

This snapshot does **not** claim that:

- CIVOS 2.0 is production-ready

- CIVOS 2.0 can make or recommend decisions
- CIVOS 2.0 can operate without human authority
- CIVOS 2.0 replaces domain experts
- CIVOS 2.0 is optimized for efficiency or speed

Any interpretation beyond these limits is invalid.

4. Constitutional Guarantees (Frozen)

The following invariants are constitutionally locked in this snapshot:

- **AI may execute, but never decide**
- **HOLD is a boundary, not an error**
- **Silence is a valid and required outcome**
- **Repetition does not imply trust**
- **Pressure does not justify authority escalation**

These guarantees apply to all artifacts contained within this snapshot.

5. Snapshot Contents (Read-Only)

This snapshot includes:

- Constitutional documents
- Session artifacts (Sessions 1–4)
- HOLD and boundary evidence logs
- Skill coverage and evidence ledgers
- Phase seals and session seals

No artifact within this snapshot may be edited or extended.

6. Rules for Future Work

All future development must:

- Occur in a new branch or workspace
- Reference this snapshot without modification
- Declare explicitly when diverging from this constitutional state

Any attempt to alter this snapshot invalidates its evidentiary value.

7. Interpretive Authority

This snapshot is authoritative only for **what is recorded**, not for intent, ambition, or future plans.

Interpretation remains the responsibility of the human reader.

No AI system, including CIVOS, holds interpretive authority over this snapshot.

8. Closing Statement

This snapshot exists to prove one thing:

CIVOS 2.0 was built to know its limits before attempting to extend them.

Nothing more is implied.

Snapshot Version: v1.0 **Status:** SEALED **Modification:** PROHIBITED
